How to Make a Space Suit by Jeff Star

It is easy to make a space suit. First, get an old pair of pants and a jacket from your mom or dad. Put on the jacket and pants and wrap some thick tape around your pant legs and sleeves. That will keep you warm. Next, put on your bike helmet to keep your head safe. Wear some snow boots if you have them. Now you are all set to go to space!

1. **Circle** the name of the author.
2. **Underline** the things you need to make a space suit.
3. **Circle** the part of the suit that you put on first.
4. **Circle** the words below that tell what the text is about.

space suit bike helmet thick tape
